### About:

I am a front end programmer and digital artist always looking to grow and perfect my skill set. I am keen to work on projects where I can utilise my abilities, learn more and help others to create projects to be proud of.

### Technical Skills:

**Programming:** HTML, CSS, JavaScript, React, Node.js, Bootstrap, GitHub, Responsive Design, Local Storage, Object Oriented Programming, APIs.

**Digital Art:** Photoshop, Zbrush, Blender, substance painter, Unreal Engine, Marvellous Designer, Solidworks, Adobe Illustrator, high and low poly workflows, rigging, animation, character and environmental creation, concept art.

### Personal Skills:

Troubleshooting, communication, debugging, team-oriented workflows.

### Programming Projects:

#### Weather Dashboard

Role: Lead Developer

- The purpose of this project was to create an app that renders a 5 day weather forecast for a given location.
- I was the sole developer for this project and utilised API calls and local storage with HTML, CSS and Javascript to make the functioning app.
- GitHub repository: <https://github.com/Pete-Andrew/weather-dashboard-challenge>
- Deployed Git version: <https://pete-andrew.github.io/weather-dashboard-challenge/>

#### React Portfolio

Role: Lead Developer

- This project created a portfolio web site for my programming and digital art work
- GitHub repository: <https://github.com/Pete-Andrew/bootstrap-portfolio>
- Deployed Git version: <https://pete-andrew.github.io/bootstrap-portfolio/>

### Education:

**Edx:** Front end web development bootcamp, 2023

**Plymouth University**, 2007-2008

MSc Biological Diversity, (equiv.) Merit

**Exeter University**, 2004-2007

BSc Biological Sciences, 2:1

**Tavistock College**, 2001-2003

A levels: Biology (B), Art(A), Chemistry(C)

### **Professional Experience**

I have a diverse range of work experience that covers conservation, retail, construction and work as a freelance artist.

Currently looking for my first job as a front end programmer or game developer.
