Programming Projects

Weather Dashboard
Role: Lead Developer

- The purpose of this project was to create an app that renders a 5 day weather forecast for a given location.
- I was the sole developer for this project and utilised API calls and local storage with HTML, CSS and Javascript to make the functioning app.
- GitHub repository: https://github.com/Pete-Andrew/weather-dashboard-challenge
- Deployed Git version: https://pete-andrew.github.io/weather-dashboard-challenge/

Bootstrap Portfolio
Role: Lead Developer

- This project created a bootstrap portfolio site for my programming and digital art work
- GitHub repository: https://github.com/Pete-Andrew/bootstrap-portfolio
- Deployed Git version: https://pete-andrew.github.io/bootstrap-portfolio/
